

Actlabs is an innovative, fast-growing company with a history of more than 28 years of constantly bringing the **newest technology and methodologies** to market, helping companies to achieve their goals in over 90 countries through its global network of laboratories.

Actlabs goal is to provide **prompt, accurate, high-quality and cost-effective development and testing** in order to reduce risks, improve quality, productivity and profitability of our customers.

# Mycotoxins Testing

## Mycotoxins Testing

Mycotoxins are naturally occurring secondary metabolites of molds and can infect various agricultural commodities in the field and post-harvest. Mycotoxins pose a serious health hazard from feed and food refusal to death of humans and animals. Mycotoxins can travel up the food chain as they are not typically removed by processing.

Actlabs Agriculture offers **Liquid Chromatography Tandem Mass Spectrometry (LC-MS/MS)** high-quality testing using a robust method for accurate quantitation of mycotoxins. It prevents overestimation, underestimation, false positives or negatives and can be applied to a wide variety of matrices.

## Customer Benefits

- Gold standard LC-MS/MS analysis
- Customized analysis and reportings
- Essential customer service
- Quick turnaround time
- Stable trustworthy partner
- Online account with ability to access data 24/7
- Ability to export results in Excel or other formats for data analysis

### Mycotoxins testing will help you to:

- Improve animal performance
- Troubleshoot animal health issues
- Prevent spoiling of harvested and processed crops
- Prevent potential hazards for human health
- Ensure your products comply with health and safety regulations
